

New Ez-SPD Programmer

The Ultimate SPD Programmer

CST Inc, leading worldwide manufacturer of Memory Tester and Automation Handler is proud to introduce the most affordable SPD EEPROM Programmer for SDRAM, DDR, DDR2 & DDR3 DIMM /SODIMM Memory.

This EZ-SPD Programmer is specially designed for high volume memory distributors, memory module manufacturers, dealers and service depots.

The EZ-SPD DDR3 Programmer is offered with a standard 240pin DIMM socket for programming the latest PC3-6400 & PC3-8500 DDR3 memory modules.

EZ-SPD Feature

Identify Memory Module via SPD EEPROM

- Frequency
- Memory Size
- Memory Type
- Unbuffered or Registered DIMM

User Friendly Graphical Interface

- Easy usage for non-technical user
- Intuitive pull down menu
- Helpful tutorial
- Extensive SPD Data Library
- Unlimited File storage

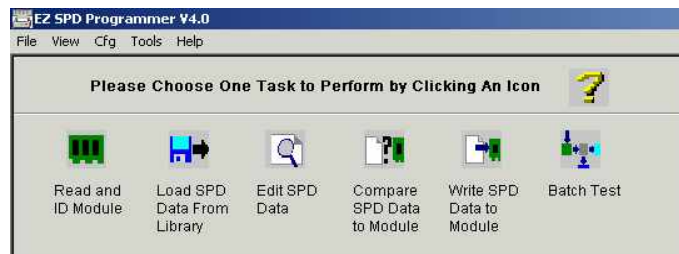

Hardware /Software

- Easy Push Button Test Selection
- Colored LED for Test Status
- Easy to replace Test Socket
- Interface to PC Parallel Port
- PC Software upgrade via internet
- Interface to CST RoboFlex Handler

How does Ez-SPD Works?

- Ez-SPD allow user to read SPD codes and automatically identify the Size, Speed grade, and structure of memory module
- Ez-SPD allow user to correct the SPD content and rewrite the SPD content in the EEPROM
- EZ-SPD captures and saves the SPD codes for future reference
- EZ-SPD allows extraction of SPD codes for editing and comparison

Technical Specification

SPD Read Range	: Editable Read Byte : 0 – 255
SPD Write Range	: Editable Write Byte : 0 – 255
SPD Write Page Size	: User selectable 1,4,8 & 16 Byte
SPD Data Editing	: Editable Byte Range : 0 – 255
SPD Byte Masking	: User Define (0 – 255)
SPD Serialization	: User input
SPD Write Protect	: Software /Reversible

General Specification

DDR3 Test Adapter	: 240 Pin DDR3 DIMM (Standard) 204 Pin DDR3 SODIMM Converter
Power Adapter	: input 100 /250 Vac, 50 /60Hz Output 12 VDC @ 3A
Operating Temperature	: 15 ~110 Degree F
Dimension	: 8.25" x 4.25" x 1.25"
Weight	: 5 pounds
