MANAGEMENT

LESS is MORE

WE CHOSE TO DO MORE FOR THE ENVIRONMENT EVERY DAY BY POLLUTION LESS

KOMBI SERIES

KOMBI SERIES

Modular ultrasonic cleaning systems for water-based processes consisting of several sections for washing, rinsing and drying various parts.

In more compact versions, they allow the removal of many contaminants from various surfaces and industrial parts.

Larger versions in terms of the number of sections extend their use for more complex applications even with the use of different detergents and drying systems.

The cleaning program is fully configurable and storable by the operator, allowing selection of times, automatic handling speed, agitations, inclined basket draining, working temperatures and ultrasonic settings.

Systems equipped with remote assistance for remote control.

WHY CHOOSE IT

- Maximised effectiveness in high precision cleaning
- Designed to remove many contaminants from various surfaces and industrial parts
- High automation and productivity
- Low operating and maintenance costs
- Ease of use for the operator
- Easy and intuitive process parameter setting via touch screen
- Attention to consumption and the environment
- Entirely designed and built in Italy

APPLICATIONS

- Medical, automotive, electronics, fine mechanics, aerospace, watchmaking, goldsmithing and fashion accessories

CUSTOMISATION

Possibility to adapt and customise the system according to customer needs

STANDARD MODELS

Model	Tank dimensions	Basket dimensions	Maximum robot load	Overall dimensions	Cleaning Cycles /h
KOMBI 8/4 A	170x300x180h	100x230x180h	10 kg	2700x1200x2450h	6-12
KOMBI 24/4 A	300x400x250h	235x323x220h	20 kg	2385x1030x2380h	6-12
KOMBI 36/6 A	300x400x300h	235x323x270h	20 kg	3900x1030x2400h	5-10
